

FeurerWorks

Corporate Information

1 Overview

The mission of FeurerWorks is to offer the best quality for custom-made solutions and services.

With the development of the LivCos product as the core business we bring the user closer to the computer. Also, as a leading edge Web 2.0 application, it allows us to pass valuable hands-on experience to the customer.

We address the customer with a service based approach to ensure optimal added value.

The legal form of an "Einzelfirma" (simplest legal form for a company in Switzerland) provides a good flexibility with a small administrative overhead.
